### Source of data

Observations were drawn from Hawker {station 019017}.

The closest sunshine and evaporation site is Woomera, 170 kilometres to the northwest. In most cases these should give a guide to daily sunshine and evaporation in the area. Sunshine is affected by cloud, and evaporation is affected by cloud, relative humidity, temperature and wind strength during the day. See climate maps for average values.

You should read the **important information** in [these notes](#).
