

July 2008 Temperatures during July were close to long-term means. Noteworthy was the warmest day of 22 degrees on the 19th followed by the coldest day of 11.9 degree the next day. For most of the day the temperature was below 8 degrees. Although rain was recorded on 11 days the heaviest was only 5mm and the monthly total of 13.8mm was well below the average and followed the trend in recent years of well below average winter rains.
