

December 2008 Rainfall continued into December culminating with the highest daily total for 2008 on the 12th. Half the year's total rain of 220mm fell in the 6-week period from 1st November to the 13th December. Maximum temperatures were well below average for the month, continuing the trend that started in November. The hottest day was only 36.4 degrees, even less than the 37 degree days recorded in both October and November.
